In Conversation with **SONU GANDHI**

Renowned Fashion Designer
Co-Founder of Brand Sonu Gandhi

“NIIFT is one of the most sort after institutes in the field of design. As an employer, our personal experience with their students has been extremely satisfying. They are well equipped with the knowledge through theoretical and practical learnings. Creativity and handwork are virtues NIIFT goes by.”

Our Proud Alumni
Karanbir Singh

KNITWEAR DESIGNER

"NIFT has got me the skills which are very important to exceed in life. It's the only institute in Punjab which provides specialized knowledge in knitting as well as in designing.

The College provides a free atmosphere to discover creative abilities and execute your imaginations into reality. The faculty here is overwhelmingly helpful."

Badal Kumar

FASHION DESIGNER

“The most important thing I got at NIIFT campus was the freedom to create. Boundaries are pushed for the students of NIIFT. Being at NIIFT, helped me find my own language and aesthetics which I think is the most important thing for any artist.”

INTERNATIONAL
LITERACY
● DAY ●

Proud of our illustrious alumni – Mr. Radesh Agahari.

Radesh student of NIIFT (Mohali) providing a livelihood to Tribal and villagers by producing fiber from chicken feathers. He has been awarded under the category of “**INNOVATION OF CLEAN TECH**” by NITI AYOOG for his work.

ocm models that do not cater to Indian requirements

Radesh Agahari, founder of the company, working with chicken feathers.

One of the founders was Radesh's brother, Agahari (R), who was awarded under Innovation in Clean Tech category for his work in creating a sustainable and eco-friendly way of producing fiber from chicken feathers. Agahari has developed a patented process that converts the waste into high-quality yarn and natural fibers. "Around 23-27% of the pollution is now being taken care of by the chicken feather waste that produces fibers and dyes."

The company's waste water is recycled and other organic gases that are produced are used as a natural product. While Agahari's work is still in progress, it has already received a lot of attention from the Indian Institute of Technology (IIT) and the Indian Institute of Design (IITD).

"For our design thinking classes, we were asked to find an eco-friendly and cost-effective solution to a social problem. While Agahari's work is still in progress, it has already received a lot of attention from the Indian Institute of Technology (IIT) and the Indian Institute of Design (IITD)."

From 2013 to 2018, Agahari received a lot of attention from the Indian Institute of Technology (IIT) and the Indian Institute of Design (IITD). He was awarded under the Innovation in Clean Tech category for his work in creating a sustainable and eco-friendly way of producing fiber from chicken feathers. Agahari has developed a patented process that converts the waste into high-quality yarn and natural fibers. "Around 23-27% of the pollution is now being taken care of by the chicken feather waste that produces fibers and dyes."
